

**ADDRESS BY THE CHAIRMAN OF THE ELECTORAL COMMISSION,
JUSTICE DR. CHIFUNDO KACHALE ON PUBLIC VIEWING OF
PRELIMINARY CONSITUENCY AND WARD BOUNDARY MAPS**

15TH FEBRUARY 2022

GOLDEN PEACOCK HOTEL, LILONGWE

Salutations

- My Fellow Commissioners
- The Acting Deputy Chief Elections Officer (Finance and Administration), Mr. Khumbo Phiri
- Management and staff from MEC
- Members of the Press
- Ladies and gentlemen

Greetings,

It is a New Year, so it is not too late to wish you a happy New Year again since this is the first public activity from the Commission. As promised in the New Year message, among other tasks, the Commission is prioritising the conclusion of the constituency and ward boundaries review exercise which started last year.

Ladies and gentlemen, today, the Commission has convened this press briefing to give an update on the boundary review process, explain in detail regarding the preliminary map review to run from 4th March to 17th March 2022 and give an overview of the upcoming activities to the conclusion of the boundary review process.

Legal framework on boundary review

Ladies and gentlemen, let me start by again restating on the law that form the legal framework which regulates the review of constituency

and ward boundaries and the determination of the number of constituencies for purposes of elections, because the address today is hinged on that.

The Malawi Electoral Commission is mandated, under Section 76 (2) of the Constitution of the Republic of Malawi, to:

- (a) determine constituency boundaries impartially on the basis of ensuring that constituencies contain approximately equal numbers of voters eligible to register, subject only to considerations:
 - (i) population density*
 - (ii) ease of communication and*
 - (iii) geographical features and administrative boundaries.**
- (b) review existing constituency boundaries at intervals of not more than five years and alter them in accordance with the principles laid down in subsection 2(a) above.*

Further and complementary to the Constitution of the Republic of Malawi, the Commission is the body which is responsible for determining the number of constituencies for the purposes of an election.

It is specifically provided under section 8(1)(a) that in addition to the broad functions and powers that are conferred on the Commission by the Constitution, that Commission shall have the function of

determining the number of constituencies for the purposes of elections.

In accordance with the law, once the number of constituencies has been determined, the number of wards is dependent on the number of constituencies and the nature of the council. The law sets a limit on the number of wards in Cities, Municipals and Towns. It also restricts the number of wards in constituencies in all other councils to a maximum of two.

The entire exercise is being implemented based on these legal provisions. The principal factor which has been considered, is the number of people eligible to register to vote, so that there is equality of the vote. The law has also provided other factors to be considered. These other factors have been applied by taking into account the geographical peculiarities of the Constituencies and Councils.

Development of preliminary maps

Ladies and gentlemen, as you might be aware, on 27th October 2021 the Commission announced a determination on the number of constituencies per council which brought the total number of constituencies for the September 2025 Tripartite Elections to 229.

After the determination of the total number of constituencies per council, the Commission constituted and trained the Constituency

and Ward Boundary Review (CWBR) Teams at every council to develop at least two map scenarios under strict adherence of the provisions of the law and the guidelines set up by the Commission.

The teams worked diligently: conducting site visits and engaging with stakeholders. When the teams came up with the scenarios, the Commission made it a point and provided resources to ensure that the teams present their work to their critical stakeholders before submitting to us for further review.

As the Commission, we would like to commend the teams for working tirelessly and diligently, their work has a full chapter in the book of boundary review.

Scrutinising of scenario maps from the councils by the Commission

The Commission received the scenario maps from mid-December 2021 to early January 2022 and spent the whole of January 2022 reviewing each map scenario from the councils and coming up with the ones that best reflect the law and the guidelines stated above. This is the version that will be presented to the nation as the preliminary boundary map and corresponding detailed descriptions.

Considerations on setting the boundaries

Ladies and gentlemen, as always said, the Commission is using statistics from the National Statistical Office (NSO) regarding the population of eligible voters in 2025. The estimated number of eligible voters is **10,957,490** for the whole nation.

For every council, the Commission had a quotient which was arrived at by dividing the total number of eligible voters against the number of constituencies as determined by the Commission. In setting the boundaries, the Commission allowed for variance of plus or minus 10 percent. Only in exceptional cases, and with a very solid and plausible explanation, did the Commission allow a situation whereby the estimated population of eligible voters falling outside the acceptable variance.

Ladies and gentlemen, you will recall that in determining the number of constituencies the Commission considered also other factors like geographical features and ease of communication. This means that the population for constituencies may not be the same. Inevitably, there will be some variances since councils do not have the same geographical features. Further, to that, stakeholders should take recourse to the fact that according to the law, constituency boundaries should not cross administrative boundaries and in this case councils. Therefore, the minimum number of constituencies any council can have is ONE, regardless of the size of its eligible voter population. Likoma, Luchenza Municipality, Karonga Town, Mangochi Town and Kasungu Municipality fall in this category.

In coming up with the boundaries, the Commission followed physical features that could make the boundaries easy to follow like roads,

mountains, river courses, boundaries of traditional authorities, council, and international boundaries. In some cases, constituency boundaries have traversed traditional authority boundaries. However, this does not mean that the Commission has split the chieftdom or settled a boundary dispute. The constituency and ward boundaries are for the purposes of elections only.

Total number of constituencies, wards, and their names

Ladies and gentlemen, as said earlier the total number of constituencies is 229 from the 193, we have had since 1998. The determination on the number of wards is determined by the law which set the maximum each city, municipality and town should have, and that the rest of the constituencies should have not more than two wards. Currently, we have 462 wards, but the new proposal increases the number to 500 wards.

During the sensitization process, the Commission encouraged stakeholders to come up with names for the wards and constituencies that truly reflect the area being represented with an encouragement for local names as opposed to using cardinal points. However, there are cases whereby names were not proposed. These have been indicated or named using letters of the alphabet. We are hoping that by the time we get to the public hearing stage, we shall have the names of the said electoral areas. If not, the Commission shall use cardinal points to name them.

The breakdown of the constituencies, wards and the suggested names and projected population of eligible voters for the constituencies and wards have been attached as an appendix to this speech.

Public display of preliminary maps

Ladies and gentlemen, let me emphasise that these are preliminary, and NOT FINAL maps. The Commission is presenting them to the public for scrutiny, review and possibly to get feedback that can help in perfecting them.

The Commission, with the help of the councils, has identified public places where the maps will be displayed from 4th March to 17th March 2022. These include council offices, Parliament, council headquarters, Traditional Authority Headquarters and Teacher Development Centres that were used as nerve centres during the 2019 Tripartite Elections. The maps will also be accessible on MEC website and other electoral stakeholders like the political parties, CSOs and the Media. This is to give an opportunity to everyone to go and view the map of any area where they are interested. There is also no age restriction. The Commission is appealing to the general public to avoid tearing, defacing, “graffitiing” or removing the maps from where they have been affixed for public viewing because they have been printed at a quite considerable cost.

The maps will also be available on the MEC website www.mec.org.mw/boundaryreview

The Commission will also make available the maps in electronic format to all political parties that are existing in the register of political parties.

What to look for on the maps?

The Commission would want to offer some tips on what to look for when viewing the maps. The maps have been printed at council level and each council has been given its own maps.

I should emphasise that stakeholders should apprise themselves with the legal provisions on boundary review and the principles that were followed by the Commission in this exercise. And they should check to satisfy themselves that the Commission has followed them.

The Commission is encouraging stakeholders to check if the proposed names of the constituencies and wards correspond and truly represent the area covered. At the same time stakeholders should check and propose names for constituencies and wards that have no names. These names would be ratified during the public hearing.

Presenting feedback on the maps

The Commission will from 11th April to 23rd May 2022 conduct public hearings in all the councils in the country whereby stakeholders shall be invited to give their views and observations physically to the

Commission. These shall include traditional leaders, political parties, academia, CSOs, special interest groups for women, people with disabilities, the youth, and other vulnerable groups. However, with Covid-19 restrictions and other factors, the Commission is aware that not everyone can make it to the meetings. So, the Commission is encouraging stakeholders to send in written feedback through their respective council offices or through email cwbr@mec.org.mw. Feedback should be received by 24th March, 2022.

Outstanding budget for remaining activities

The initial budget for 2021/22 for the boundary review was MK1.2 billion. Government committed and funded MK700 million. The difference of MK500 million was expected to come from an investment with Alliance Capital. However, that money has not yet been given because of the challenges at Alliance Capital. The Commission has since taken the matter to court to recover this investment.

In the course of implementing the activities, the Commission was faced with increasing operational costs like rising fuel costs and holding of meetings with stakeholders which were not part of the initial activity plan. These widened the funding gap which could have seen the Commission asking for more funding in this financial year. However, the Commission is aware of the resource constraints and the financial situation the country is sailing through. The Commission undertook a review exercise to cut on costs where possible in the

implementation of the remaining activities like reducing number of days, number of staff and even scraping off some meetings with stakeholders.

For 2022/23 budget, the Commission would initially have requested for K700m to finish the boundary review process but after the revision the amount has come to MK158m.

Some of the areas the Commission has scaled down include;

- Public hearings reduced by MK146m
- Stakeholders' sensitization meetings in all Councils reduced by MK70m
- Field visits for the Demarcation – 35 Councils reduced by MK64m
- Public viewing monitoring – 35 Councils by MK29m, among others.

Remaining activities on the boundary review process

The activities that lie ahead after holding the public sensitization process include:

1. Public Hearings: The Commission will conduct public hearings in all the councils to get feedback from all stakeholders on the preliminary maps from 11th April to 23rd May, 2022. After this the Commission will go back to review the feedback received and incorporate into the final report for the exercise.

2. Consultation through NECOF: After analysing and synthesizing the comments and feedback from the public hearings, the Commission will hold meeting with political parties, CSOs, chiefs and other stakeholders between 28th June and 2nd July 2022.
3. Meeting with Parliament: The Commission will engage Members of Parliament on 21st July 2022 before submission of report about the exercise. This engagement will provide an opportunity for the Commission to provide explanations to any questions the honourable Members of Parliament might have on the report before it is formally submitted for confirmation.
4. Submission of report on constituencies to Parliament: as per provision of the law, the final report must be confirmed by Parliament, and in accordance with that provision the Commission will present the report on 1st October, 2022.

Once the report has been confirmed by Parliament, the Commission will proceed to print the new constituency and ward maps, publish them in the *Gazette* and distribute to all relevant stakeholders in 2023.

Holding of by-elections and budget

Ladies and gentlemen, at the moment there are two vacant wards:

- Shire Ward in Balaka, and
- Lupembe Ward in Karonga.

For the Commission, every election is serious business as such we are eager to conduct the by-elections as soon as we can. At the moment we have developed a budget of K775,708,670.00 for holding polls in the two wards.

The budget has been presented to the Treasury whom we had engaged to provide funding so that we hold the by-elections. Every year the Commission has a provisional allocation in its budget for by-elections. However, for the 2021 and 2022 financial year this allocation was exhausted after conducting by-elections in 11 constituencies and five wards which is unprecedented for one physical year, which am certain we all are aware of the circumstances that led to such.

The Commission will announce the date when the by-elections will be held once government gives an assurance of when the funding will be available.

Recruitment of CEO and other senior positions

As you may be aware the Commission is in the process of recruiting people to fill the following positions which are currently vacant:

1. Chief Elections Officer,
2. Deputy Chief Elections Officer- Finance and Administration,

3. Director of Administration and Human Resources,
4. Director of Electoral Services and
5. Procurement Manager.

The people who are holding these positions are doing so in an acting capacity. It is, therefore, important that the positions be filled substantively, and the vacancies have since been advertised. The last day of receiving applications is the 24th February 2022. In accordance with the indicative schedule which the Commission is following at the moment, it is expected that the entire process may be concluded by 20th day of March 2022 inclusive of informing the successful candidates.

Status of the Investment with Alliance Capital

Alliance Capital Limited is currently holding the sum of MK 826, 623, 157.97. This is sum of money which at the time of the investment was not immediately required by the Commission and therefore, had to be invested as required under the Electoral Commission Act. In accordance with the investment agreement that was entered at the time, the sums were payable on the date of maturity or on demand. As of now, the Commission is yet to recover this sum of money and has taken the matter to Court. The demand by the Commission for the immediate remittance of the entire invested together with interest at the prevailing bank lending rate to be levied from the date when the

amount became due and payable to the Commission to the date when it shall be fully repaid.

Even though the matter is still in Court, it may be mentioned that Alliance Capital has admitted liability in full. On the basis of this admission the Commission has requested that judgment be entered against the Company. The Commission is pursuing this matter and will pursue it to its logical conclusion.

Conclusion

The Commission would like to recommit to all stakeholders that it is determined to complete the exercise and is taking all necessary steps to ensure that the final report is accepted by Parliament. The Commission would like to register its appreciation to government for the continued financial support towards the exercise.

In the execution of this mandate, the Commission will remain impartial and professional. The Commission is aware that its decisions can be challenged in a court of law and as a Commission will ensure that all legal provisions are followed and complied with to the letter in this exercise so that the decisions are not overturned in the case of a challenge.

May God, the Almighty bless you

May He bless our nation.

Thank you.
